PROFILE

Multidisciplinary full-stack web developer and IT specialist who builds and maintains web applications, automates workflows, and delivers hands-on IT support and training — combining full-stack development, AI tooling, and technical consulting. I also teach and train individuals in IT skills, from basic computer literacy through to intermediate tech and computer skills. Comfortable inside real codebases with Git/GitHub and Figma-to-development workflows, focused on clean, scalable solutions and dependable outcomes.

EXPERIENCE

Frontend Engineer · DOXA Spectrum

Remote · Present

- Build and maintain user-facing web interfaces as a frontend engineer, working within a team codebase.
- Implement designs from Figma into responsive, production-ready components using Git/GitHub workflows.
- Collaborate on feature development, code consistency, and project architecture.

Freelance Web Developer

Remote · Jun 2021 – Present

- Design and build websites and landing pages for individuals and businesses.
- Apply AI prompt engineering and automation to streamline development and content tasks.
- Provide troubleshooting, technical support, and ongoing maintenance for clients.

IT Trainer & Technical Educator

Lagos / Remote · Ongoing

- Teach and train individuals in IT skills, from basic computer literacy to intermediate tech and computer skills.
- Break down technical concepts into clear, practical lessons for learners at different levels.
- Provide ongoing guidance and hands-on support to build learners' confidence and competence.

Digital Expert & Consultant

Remote · 2024 – Present

- Plan and present social-media campaign concepts aligned to target audiences.
- Create written, video, and image content across marketing channels.
- Boost lead generation through targeted email marketing campaigns.

KEY PROJECTS

Developer Portfolio (this site)

Nuxt 4 · Vue 3 · TypeScript · TresJS / Three.js · GSAP

A cinematic, motion-heavy portfolio with a 3D wireframe globe, smooth scrolling, and a custom animated navigation system — built with a reusable component architecture.

Spatrack — Architecture & Construction Site

Responsive Web · Figma-to-dev · spatrack.netlify.app

A professional website for a Lagos architecture and construction company, presenting their design, construction, and engineering services with a clean, responsive, client-focused layout.
